Actual joint-start trajectories, including rejected full-F trials
Small dots mark accepted steps; wall initialization and 18 coarse seeds are paid in cost totals
Final exact-J stationarity and stop reasons are reported separately

Ordinary joint GN
Normal wall / circle

Fixed forcing-current
tangent chart
Normal wall / circle

Adaptive forcing-current
tangent chart
Normal wall / circle

Boundary-connected air defect
(historical ID: blind_cavity)

Strong target / ellipse

Full objective (log scale)
