PUBLIC_DEVELOPMENT | Paid original-Phi incumbents: material error and objective

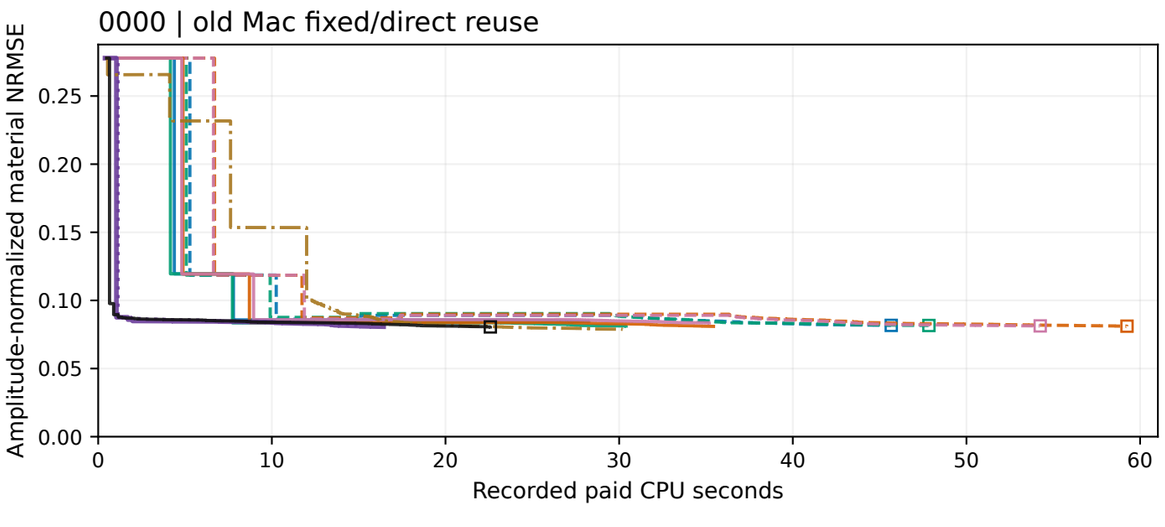

All12 fixed method/rule controls retained per case, including profile-fixed, data-continuation and direct negatives.

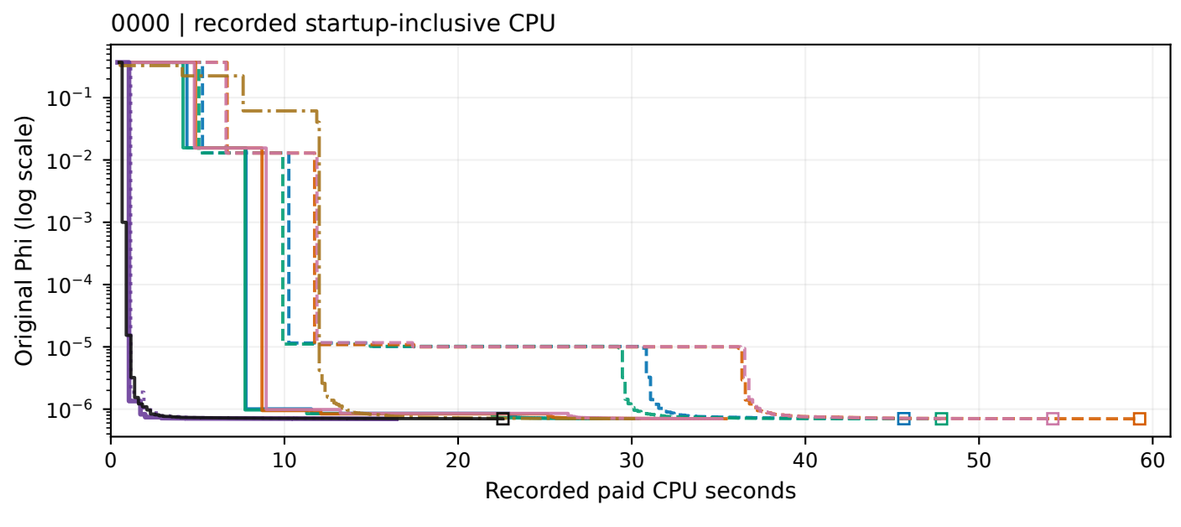

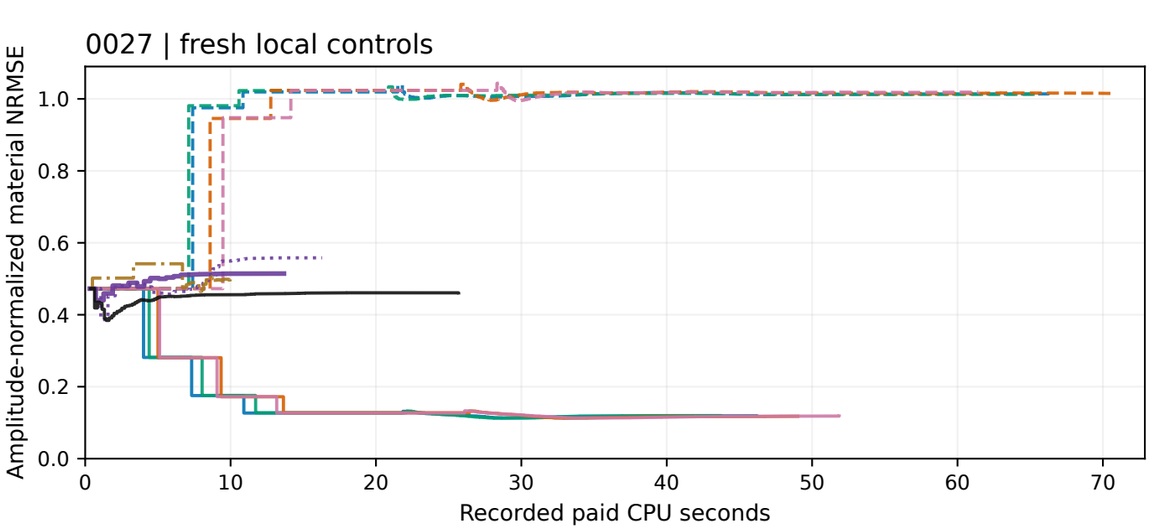

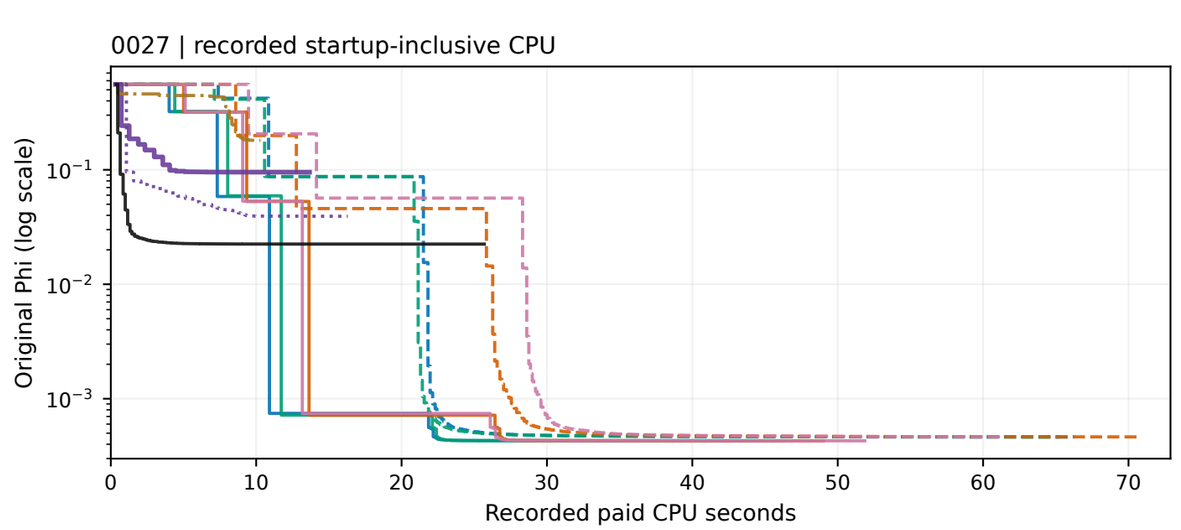

Dual fixed
Global fixed
A+ fixed
A+ source fixed
Dual noise
Global noise

Profile continuation
Profile fixed
Data continuation
Direct physical
Old Mac reuse (0000)
Startup prefix upper bound

Steps show the last saved PAID original-Phi incumbent; material NRMSE is not minimized or made monotone for display.
Landscape upper-shift CPU includes the unseparated output tail conservatively. Historical Mac reuse is not a fresh isolated timing control.
Auxiliary dense Cholesky work is included in CPU; physical LU alone is not total compute. No interpolation, GT iterate selection or new physics.
