Individually exact, jointly incompatible
required compensation z
material coordinate h
$z_1(h) = -h^2$
$z_2(h) = h^2$
joint optimum $\bar{z} = 0$
Joint first derivative remains zero at the origin
joint response norm
material coordinate h
$\min_z \|(z+h^2, z-h^2)\|_2 = \sqrt{2}h^2$
example noise threshold
