A. Two passive nonmagnetic walls
W1: n=2, d=0.25
W2: n=3, d=1/6
Relative permittivity
Depth / lambda0
B. Exact reflection match only at f0
Absolute reflection difference
f / f0
C. Downstream propagation remains different
Round-trip response difference
f / f0
D. Nine frequencies, sigma=0.01 per quadrature
Wall-only data
Wall + shifted PEC target
Whitened data distance
Fractional bandwidth (%)
