Coordinate acceleration dominates one TRAIN chart; a real normal response remains
F0: three second-order terms
Whitened response / prior-coordinate speed²
Coordinate
Prior normal
Maxwell norm only*
TRAIN weak
TRAIN ring
Intrinsic cokernel norm: bounded
||Qout (C_Maxwell + C_prior)||
[1.258, 1.614]
[0.0005534, 0.0007438]
TRAIN weak
TRAIN ring
F1: offline image risk
Complex material RMS to offline truth
ring
weak
Initial
Physics
N3
*Historical Maxwell scalar norm only: its vector is MISSING. Bounds use triangle inequalities.
Both F0 tangent and restricted-response ranks are 7; no nonzero exact prior tangent kernel. F0 TRAIN and F1 validation cases differ.
Offline risk uses two exposed backgrounds of one parent; N3 and physics conditioning differ.
