Return representation: preserved first attempt and one transpose repair
Worst of all 8 wall-target cases
Max whitened response norm
Frozen nested rank
Original adjoint projection
Transpose repair, exact target self
Whole C, same H-fitted basis
Response qualification scale .1
Full-feedback field and current defects
Max relative error / defect
Frozen nested rank
Original adjoint projection: ROI field
Original adjoint projection: closure
Transpose repair, exact target self: ROI field
Transpose repair, exact target self: closure
32 x 32 projected cores: coefficient metric
Singular value / own first value
Projected-core singular mode
Wall 0: H projected core
Wall 0: Cw projected core
Wall 2: H projected core
Wall 2: Cw projected core
Paid workloads; separate scientific purposes
Complex RHS requests
708 RHS
19 FE
256 RHS
3 FE
964 RHS
22 FE
16 RHS
8 FE
Original task
Transpose repair
