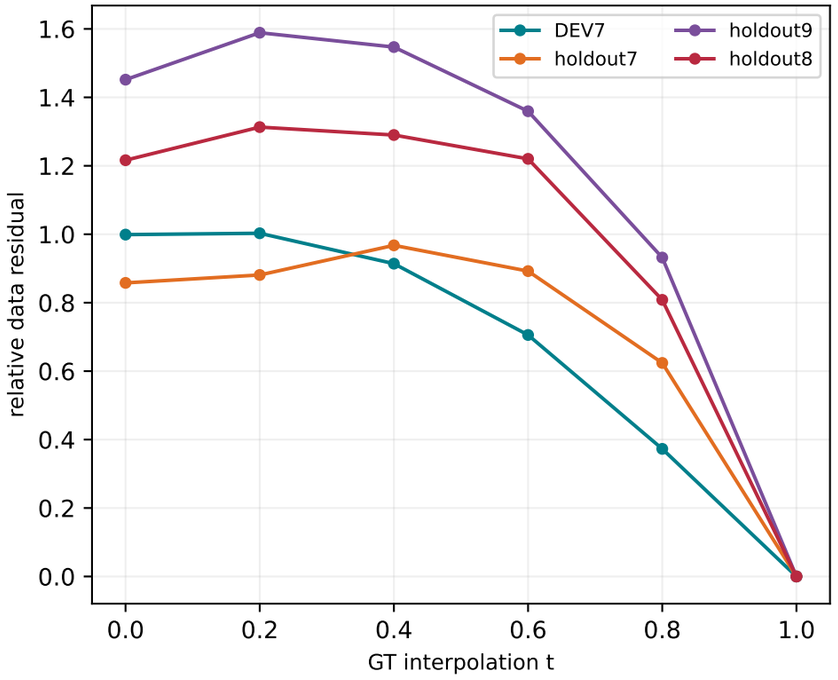
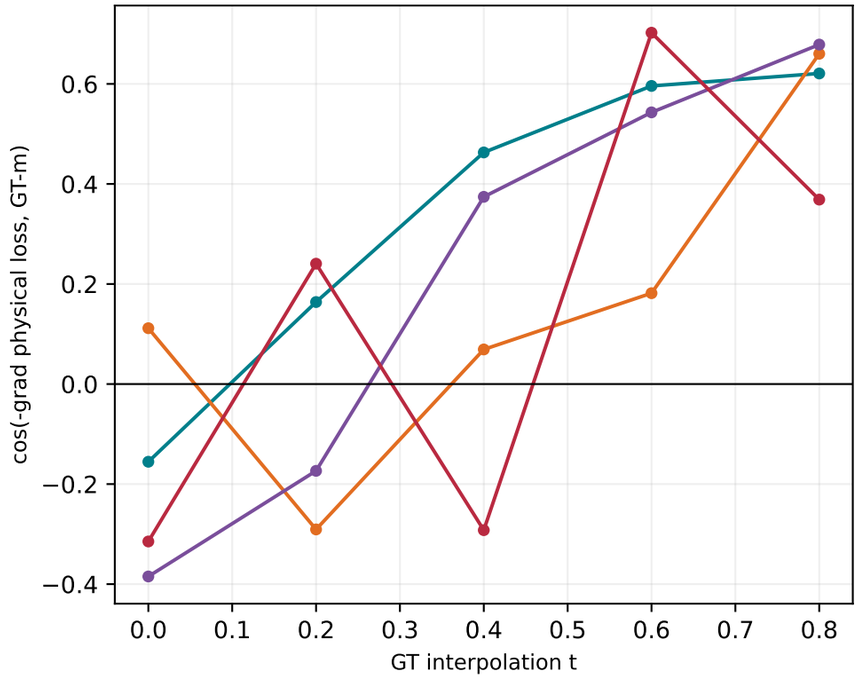
Basin geometry: 4 exposed-truth offline cases | 24 path nodes + 12 frozen endpoints

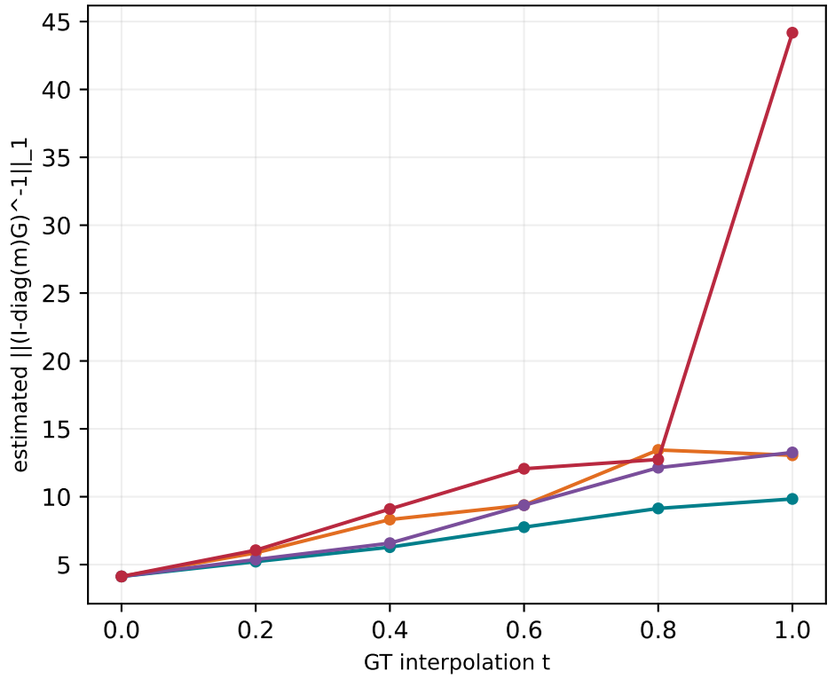
Offline GT line: residual barrier



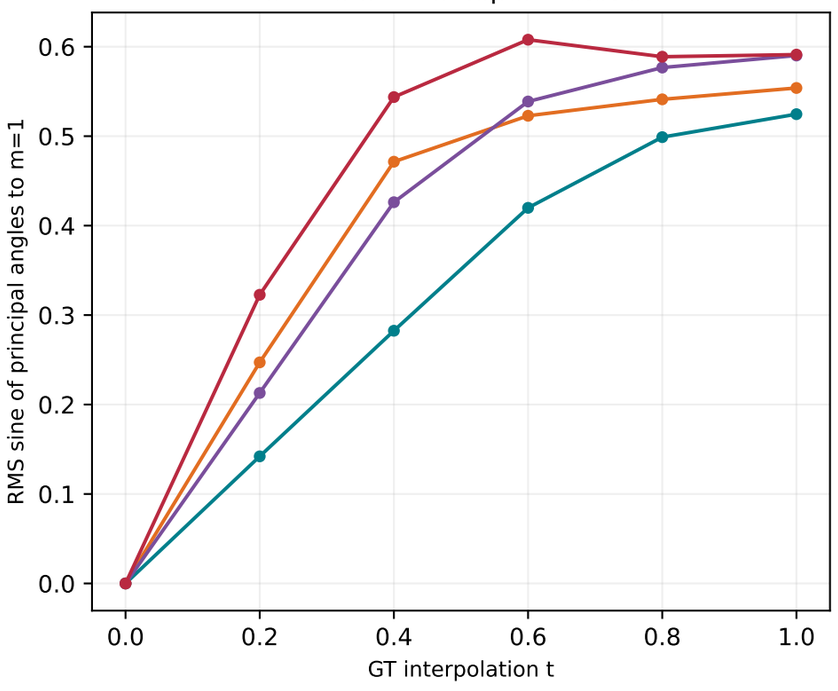
Offline GT line: descent alignment



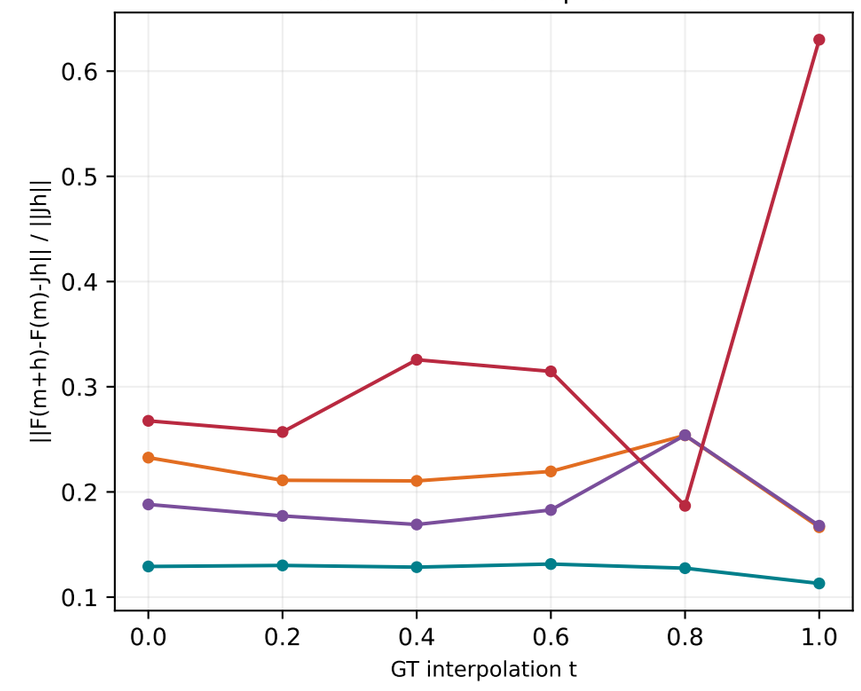
Offline GT line: resolvent estimate



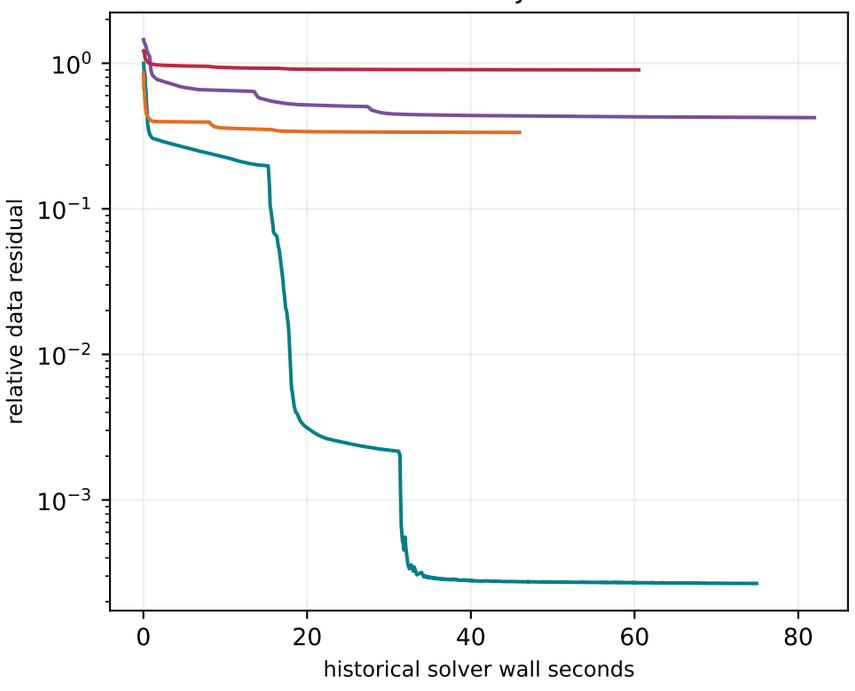
Offline GT line: top-32 rotation



Offline GT line: finite-step remainder



Frozen actual Full-J best traces



GT paths are not optimizer trajectories. Top-32 subspaces are numerical summaries, not exact-rank certificates. Fixed h=0.05(GT-1), clipped to [.5,20].
