C4_1: actual prescribed materials, Re and Im epsilon
Known-support narrow TX0/RX8 mechanism fixture; coefficient display sampling only
This pair changes wall material only; no new displaced-target multi-solution is established.
Baseline $\varepsilon_\infty = 3.75$, target (.2, 2)
Endpoint epsinf=3.85
target (0.2, 2)
Endpoint minus baseline
y/λ_0
x/λ_0
Re ε_r
Delta Re ε_r
Im ε_r
Delta Im ε_r: all samples exactly zero
