low_loss_high_contrast: actual stored complex responses
radius=0.16, contrast=8, target loss=0.002
TX 0: Complex response magnitude |d|
Magnitude
Fixed mesh
Interface-fitted reference
TX 0: Principal phase arg(d), radians
Phase / rad
Fixed mesh
Interface-fitted reference
TX 1: Complex response magnitude |d|
Magnitude
Fixed mesh
Interface-fitted reference
Stored receiver index (no interpolation)
TX 1: Principal phase arg(d), radians
Phase / rad
Fixed mesh
Interface-fitted reference
Stored receiver index (no interpolation)
Single-frequency geometry comparison. Low loss / high contrast is a stress attempt; resonance is not established.
