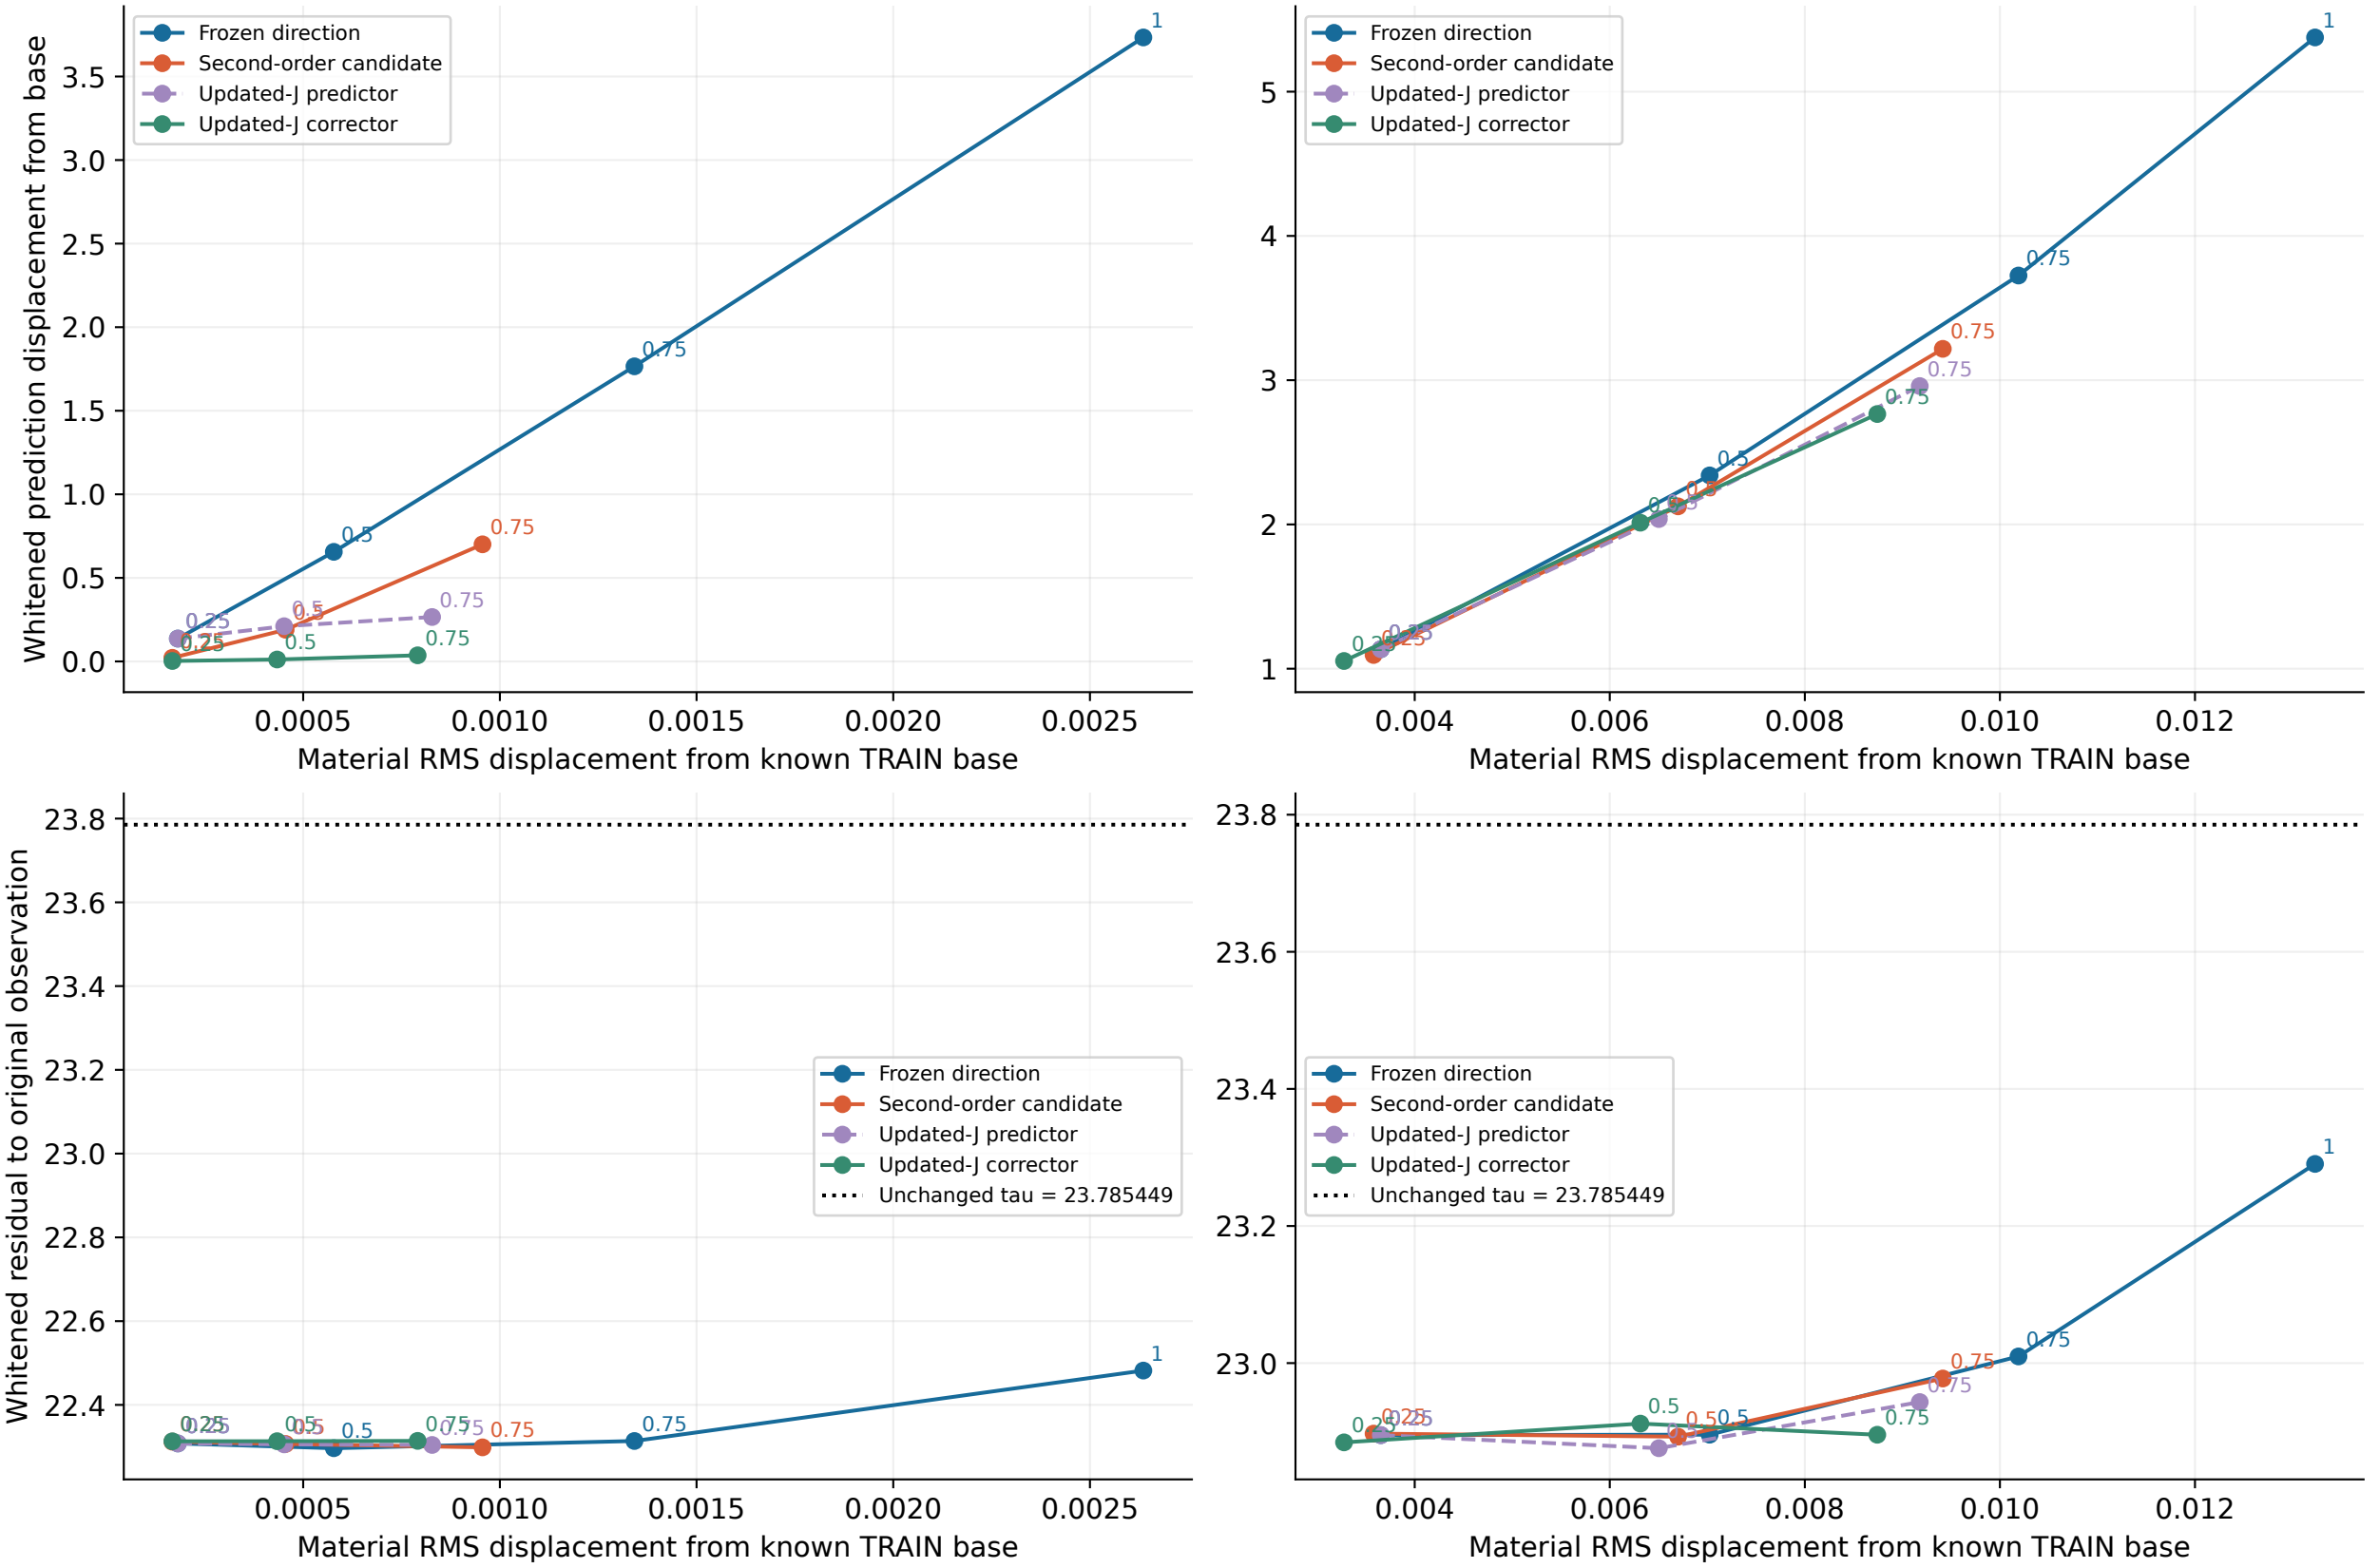
Known TRAIN paths | unequal paid work; point labels are t, not equal cost

250033_weak | known TRAIN calibration

250034_ring | known TRAIN calibration



Paid per anchor: base 1 state / 8 RHS + initial J 32 RHS; frozen 4 states / 256 RHS incl. feedback audits;
second-order 3 states / 24 RHS + curvature 8 RHS; updated-J 6 states / 48 RHS + two refreshed J / 64 RHS.
Predictors and correctors are sequential; shared setup is not allocated as an equal per-point cost.
