Digit8 NEW nonparametric stress: no ellipse, template classifier or supplied stroke support
7×7 free complex target + unknown wall12; cell/stroke0.2λ₀, glyph1.0×1.4λ₀
Same-discrete exploratory inversion; generated glyphs1..9 are NOT nine reconstructions
True target contrast
Reconstructed FREE49-cell contrast
Estimate minus truth
True independent loss
Reconstructed FREE49-cell loss
Fixed example support: contrast ≥ 1
y / reference wavelength
x / reference wavelength
